OPERATIONS :

The Company has achieved turnover of Rs.185.29 crores during the current financial year as against Rs.133.79 crores during the previous year. The Company has achieved EBIDTA of Rs.10.66 crores during the year as against Rs.7.93 crores during the previous year. However, net loss during the year has increased to Rs.1.70 crores from Rs.1.04 crores mainly due to increase in depreciation, due to adoption of new depreciation policy as per newly inserted Schedule II to the Companies Act, 2013 and increase in finance cost.

The last year was very challenging for the Company in view of the slowdown in Indian economy in general and negative growth in the capital goods industry in particular. For last two years various powers and other green field projects are either on hold or stuck due to various factors i.e; environmental clearance, financial closure etc. and consequently as Key Component/ Material Suppliers Original equipment manufacturers (OEM'S), like our company, are saddled with inventory and low business prospects.

The Company is hopeful that fresh capital investment in the power, refining and petro chemical sector will revive as the new government at Center is taking steps in that direction. Your Company is well positioned as efforts made into product development over the past few years have made your company one of the few manufacturers in the country that are capable of producing tubes for the power generation industry.

MANAGEMENT DISCUSSION AND ANALYSIS:-**(a) Industry Structure and Development:**

The growth in the product markets have shifted from the traditional focus on oil and petrochemical sector to the power sector. This shift stands to become more prominent in the next few years as the installation of nuclear power plants becomes more critical for the growth of the economy. The Stainless steel tube and pipe industry can be classified in the organized sector, in which the Company operates has witnessed a sharp growth in capacity over the past few years. However, due to slowdown in Indian economy in general and capital goods industry in particular, these are challenging times for the industry.

(b) Opportunities and Threats:

With the new government stabilizing and taking steps to revive the economy, we are hopeful that the economic environment will improve, customer sentiment will turn positive and the industry will see better growth in coming times. The growth in the power, both thermal & nuclear, fertilizer, oil and petroleum sector offer opportunities for the Company's products. However, the pricing volatility of key raw material ingredients (such as nickel) can affect demand and usage patterns of user industry as well as affect the viability of major project investments. Apart from this, installation of LNG terminals can have a substantial contribution in the usage of stainless steel tubular products. The threat of dumping of secondary quality products and imposition of antidumping duties by the government on major raw materials can have adverse effect on the demand.

(c) Outlook:

The Stainless Steel Tubular industry has strong fundamentals and the management firmly believes that this is an essential product required during the further industrialization of the country. Its expansion programme which is catered to meeting the demand for value added products is going to give the Company a chance to participate in the specialized markets which are currently dominated with few manufacturers. The approvals received from users abroad will help in redevelopment of an export market which is currently negligible in the Company's portfolio.

(d) Risk and Concerns:

The global environment continues to be marked by economic volatility. The uncertainty in the international and domestic markets may affect demand. It may also have a further impact on the Indian Rupee, which would make imports more expensive. The Company, however, is taking suitable steps to ensure protection of its margins as and when required. The high rate of interest and uncertain monsoons may continue to dampen the investment scenario in India.

(e) Internal Control Systems and their adequacy:

The Company has adequate internal control systems in technical and financial fields.

(f) Financial Performance:

The Financial Performance of the Company was under pressure during the year due to slow down in Indian economy in general and capital goods industry in particular.

(g) Human Resources/ Industrial Relations:

The Company has maintained good industrial relations and is continuously adding to the human resources of the Company.

(h) Cautionary Statement:

Statements in this report on Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be "forward looking statements" within the meaning of applicable securities laws or regulations. These statements are based on certain assumptions and expectations of future events. Actual results could differ materially from those expressed or implied. Important factors that could make a difference to the Company's operations include economic conditions affecting global and domestic demand and supply, finished goods prices in the domestic and overseas markets in which the Company operates, raw-materials cost and availability, changes in Government regulations, tax regimes, economic developments within or outside India and other factors such as litigation and industrial relations. The Company assumes no responsibility to publicly amend, modify or revive any forward looking statements on the basis of any subsequent developments, information or events.
